

New Product Announcement

1/5/2014

New Generation Plungers (NG Plungers)

MD is proud to announce about the New Generation Device Plungers for Flex TC system (-55C to 155C)

The New Generation Device plungers were designed to be strong, reliable with better performance. The NG Plunger is made of solid metal which eliminate any risk of crack.

NG Plunger features:

- Robust design increase reliability and performance
- Engraved clear marking for identification and traceability.
- PID with each plunger for better performance
- Easy and fast maintenance.
