• Hold the black sleeve in place with the thermal head and tighten the side handle.

Fine tuning Z-Axis

• Rotate the Z axis hand wheel's tension to fine tune the plunger contact with the device.

• Slide the horizontal pillar with cross block into the vertical post.
**Package layout**

- The Boom Stand is packed with parts laid out as shown in figure 1.

![Package layout diagram](image)

**Assembly**

- Place the **clap stand** at the side of the table and screw the cap tightly.

![Assembly diagram](image)

- Insert the e-arm into the end of the horizontal bar and tighten using lock wheel.
- E-arm can be inserted from the TOP, or BOTTOM of the horizontal bar. Set e-arm up at various angles and tighten the lock lever for perfect oblique viewing.
